Subject: RE: Ephemeral waters2

Hi Tina;

There has been a little confusion on my end as to which ephemeral waters issue we may have been talking about (we have a couple running at the same time). If you were referring to the 18 facilities in the general nutrient standards variance analysis that were excluded because they discharge to ephemeral waters, that would in fact be in my shop since that's nutrient standards/triennial review stuff.

Jeff Blend and I have worked through much of our review of that material as you know, and will schedule a meeting to discuss in the near future.

Thanks, Mike
